19. ABSTRACT (Continue on reverse if necessary and identify by block number) This report presents detailed cost data for each of fourteen categories of Outpatient availability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the First Quarter Fiscal Year (FY) 1993. For Quarter FY 1992 data is also presented along with comparisons between the two quarters. Appendix A (pp. A-1-71) summarizes by category of ONAS procedures and catchment area, First Quarter costs for amounts billed by the provider for ONAS services (ABS), amount allowed for the services by the fiscal intermediary (AAS), payments made by the patient other sources (TPP), total government payments for the services (TGP), percentages of to ABS and to AAS, and of TPP to TGP. Appendix B (pp. B-1-73) correspondingly shows number of services and patient episodes, and averages of ABS, AAS, and TGP by service by episode. Each appendix also contains a summary combining data for all areas (pp. A-72-73, B-72-73). Appendices C and D each comprise similar data for the Fourth Quarter 1992 period, and Appendix E compares each catchment area's inpatient, ambulatory, and ONAS professional services totals over the two quarters (pp. E-1-39), and provides a summary over all catchment areas (E-40).

Executive Summary

This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the First Quarter Fiscal Year (FY) 1993. Fourth Quarter FY 1992 data is also presented along with comparisons between the two quarters. Costs and workload factors include amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), number of services, corresponding number of patient episodes, percentages of TGP to ABS and to AAS, of TPP to TGP, and averages of ABS, AAS, and TGP by service and by episode. For the First Quarter of FY 1993, Appendix A summarizes by category of ONAS procedures and type of professional service provided, ABS, AAS, TPP and TGP, and the percentages of TGP to ABS and to AAS, and of TPP to TGP. Appendix B presents in the same sort order, the number of services and episodes, and the averages of ABS, AAS and TGP per service and per episode. Appendices A and B contain corresponding tables for every catchment area including ones for the unassigned area (pp. A-1-71, B-1-71), and summaries combining data for all areas (pp. A-72-73, B-72-73). Appendices C and D (pp. C-1-75, D-1-75) each contain similar data for the Fourth Quarter FY 1992 period. Appendix E compares the unassigned and assigned catchment areas' totals for inpatient, ambulatory, and total ONAS professional services for the two quarters (pp. E-1-39), and computes the differences between the quarters' dollar totals, number of services and number of episodes, in addition to displaying the percent changes from the previous quarter. A summary over all catchment areas is also provided (E-40).

Beginning with this report, ONAS category #68 Cystoscopy, will expand from CPT-4 procedures 52000-52318 which previously defined the category, to include procedures 52000-52340 as designated by OCHAMPUS (see Errata to Health Services Command Publication Outpatient Nonavailability Statement Procedures, Health Services Command Catchment Areas, Third Quarter, Fiscal Year 1992, and Errata, RP 92-018, DTIC: AD B167-229, July 1992). In addition, Appendices A, C and E of this report contain a new data element, Total Paid By Patient and Other Sources (TPP), which has been incorporated into the report to provide a more comprehensive view of ONAS procedure categories over time. The Fourth Quarter FY 1992 tables have been reprinted in this report to augment the expanded procedures for the Cystoscopy category and to display TPP. This allows similar data with which First Quarter FY 1993 information may be correlated. Appendix E compares summary totals by catchment area between the reported and previous quarters, and was introduced into this report to facilitate the observation of trends.

Outpatient Nonavailability Statement professional workload is presented by both services and episodes. Episodes were computed by sorting claims by patient identification number, treatment ending date, and procedure. All claims for a unique patient/date/procedure level were counted as being one episode. Using the patient per episode logic effectively controls for service billings where, when applicable, the technical and professional components are billed separately.

Total government payments for the claims, ABS, AAS, number of services, number of episodes, and additionally the total amount allowed for the claims were then grouped and summed by billable medical treatment facility catchment area, by type of professional service (inpatient/ambulatory), and by ONAS category of procedures. Government payment for each category of ONAS procedures was estimated by aggregating within each group the sum of the total amount allowed for the service, the total amount allowed for the claims, and the total government payments for the claims. Each group's amount allowed for services was then divided by its amount allowed for claims and this ratio was multiplied by the group's sum of government payments for the claims, thus obtaining the total government payment for the group. Transactions having no government cost, no patient cost, and no total amount allowed were deleted prior to summation, as well as those where the fiscal intermediary denied the claim.

Each ONAS procedure record in the First Quarter FY 1993 data was extracted from the TCSDP main database based upon a processing date in that quarter. Amounts in these tables may reflect an unstable condition due to part of a claim payment being processed outside the time interval (i.e., FY 1992 or the Second Quarter of FY 1993). Whenever possible, obvious unstable conditions were marked with an asterisk (*). Sometimes under these unstable conditions, some equations were not computed. In such cases, a decimal point (.) was used to fill space for answers not computed. Decimal point notation was also used to fill space when a variable had no data for a grouping. In addition, on several occasions the number of episodes for a procedure is greater than the number of services. This occurred when one of the services was an adjustment and no workload credit was given.

In the First Quarter FY 1993, as shown in Appendices A and B, TGP for all ONAS professional services procedures in a catchment area ranged from a low of \$8,040 to a high of \$237,743, with the corresponding ABS from \$20,093 to \$331,781, AAS from \$12,616 to \$278,118, TPP from \$7,441 to \$41,287, number of services from 34 to 697 and number of episodes from 34 to 626 (pp. A-10, A-44, B-10, B-44). Total government payments for all ONAS procedures in all catchment areas for the quarter were \$5.56 million, while ABS, AAS and TPP for the identical services/episodes were \$11.83, \$7.75 and \$3.43 million respectively (pp. A-72-73). The number of services for ONAS procedures in total

across all assigned and unassigned catchment areas was 21,278 with 17,872 patient episodes (pp. B-72-73). In the First Quarter, 24.6% of TGP for all ONAS procedures, 23.6% of the corresponding number of services, and 25.2% of the episodes were for professional claims submitted while the patient was either an inpatient at a hospital, or when a hospital submitted institutional billings for an ambulatory episode in conjunction with the ONAS professional billings (pp. A-72-73, B-72-73). These services are labeled Inpatient Professional Services in Appendices A-E. System-wide, the professional services ABS per episode ranged from \$340.79 to \$1,701.87 for ambulatory professional services depending on the category of ONAS procedure (pp. B-72-73).

Total government payments rendered for ONAS professional services over all catchment areas for the First Quarter ranged from only 37.2% to 67.6% of what was actually billed by the provider (pp. A-72-73). Again, the government paid from only 57.4% to 97.4% of the amount allowed by the fiscal intermediary for the same services, when examining all catchment areas as a whole. Some tables in Appendix A may compute TGP as being 100% of AAS and/or ABS. This condition is usually confined to when the patient is treated on an inpatient basis and there is no co-pay. The differences between what the government actually paid and what was either allowed or billed were a result of disallowed charges, patient co-pays and deductibles, and coordination of benefits (other health insurance payments) which designated CHAMPUS as second payer. These "adjustments" to billed and allowed charges, as demonstrated above, are substantial. Depending on the category of ONAS professional services, the total amount paid by patients and other sources (TPP) over all catchment areas ranged from 9.8% to 116.1% of the total amount paid by the government (pp. A-72-73). Correspondingly, for the two ONAS categories comprising the endpoints of the range noted immediately above, TPP varied from 5.6% to 43.1% of the amount billed by providers (ABS) and from 9.2% to 66.6% of the amount allowed by the fiscal intermediary (AAS) (pp. A-72-73).

Fourth Quarter FY 1992 statistics similar to those highlighted for the First Quarter of FY 1993 in this Summary may be found in the Health Services Command Publication Outpatient Nonavailability Statement Procedures, Health Services Command Catchment Areas, Fourth Quarter, Fiscal Year 1992 And Full Fiscal Year 1992, RP 93-004, LTIC: AD B169-904, November 1992). The Fourth Quarter tables have been reprinted in this report as Appendices C and D (pp. C-1-75, D-1-75) and incorporate the newly reported TPP data element and expanded Cystoscopy professional service procedures.

Appendix E compares Fourth Quarter FY 1992 to First Quarter FY 1993 summary totals by catchment area and type of professional service (pp. E-1-39), including an analysis for the unassigned

area. A summary table combining the unassigned and all assigned catchment areas (pp. E-40) is also presented. This recapitulation table shows that inpatient professional services decreased between quarters for number of services (-3.20%), number of episodes (-4.86%), and all money amounts except TPP, total patient and other sources paid. ABS for inpatient professional services decreased -5.85%, AAS -9.54%, and TGP -8.66%, while TPP showed a 3.15% increase over the quarter. Ambulatory professional services over all areas between quarters decreased in number of services (-6.41%) and episodes (-5.69%), and all money fields (ABS -3.17%, AAS -6.31%, TPP -1.85% and TGP -7.98%). Although the percent change rate of decrease for services/episodes was slightly faster for ambulatory professional services than for inpatient professional services over the quarter, ABS, AAS, and TGP for the ambulatory services did not decrease as quickly as did inpatient professional services. TPP for ambulatory professional services decreased -1.85% for the quarter. Between the Fourth Quarter FY 1992 and the First Quarter FY 1993, combined inpatient and ambulatory ONAS professional services for all areas showed a decrease in TGP by -\$493,411 (-8.15%), ABS by -\$467,002 (-3.80%), AAS by -\$587,007 (-7.04%), TPP by -\$34,129 (-0.98%), number of services by -1,278 (-5.67%), and number of episodes by -1,037 (-5.48%) (p. E-40).

Technical Note. The following TCSDP data were utilized for report:
